

STOCK PICKERS AERIAL WORK PLATFORMS

JLG
reachingout

www.jlgeurope.com

A worker in an orange safety vest is operating a JLG Stock Picker in a warehouse. The machine is positioned between tall metal shelving units filled with cardboard boxes. The worker is reaching up to a high shelf to handle a box. The JLG logo is visible on the machine's mast.

Experience a higher level.

It's time to put your ladders away. In stores, warehouses and distribution facilities, they've been replaced by a safer, more productive alternative – JLG® Stock Pickers. Whether you are transporting supplies, setting up displays or performing routine maintenance, JLG Stock Pickers make your everyday tasks more efficient and allow you to reach up to 8 m and lift up to 160 kg, while manoeuvring in confined working areas.

Choose from a range of machines to manage your inventory more productively. Stock up on safety, performance and productivity.

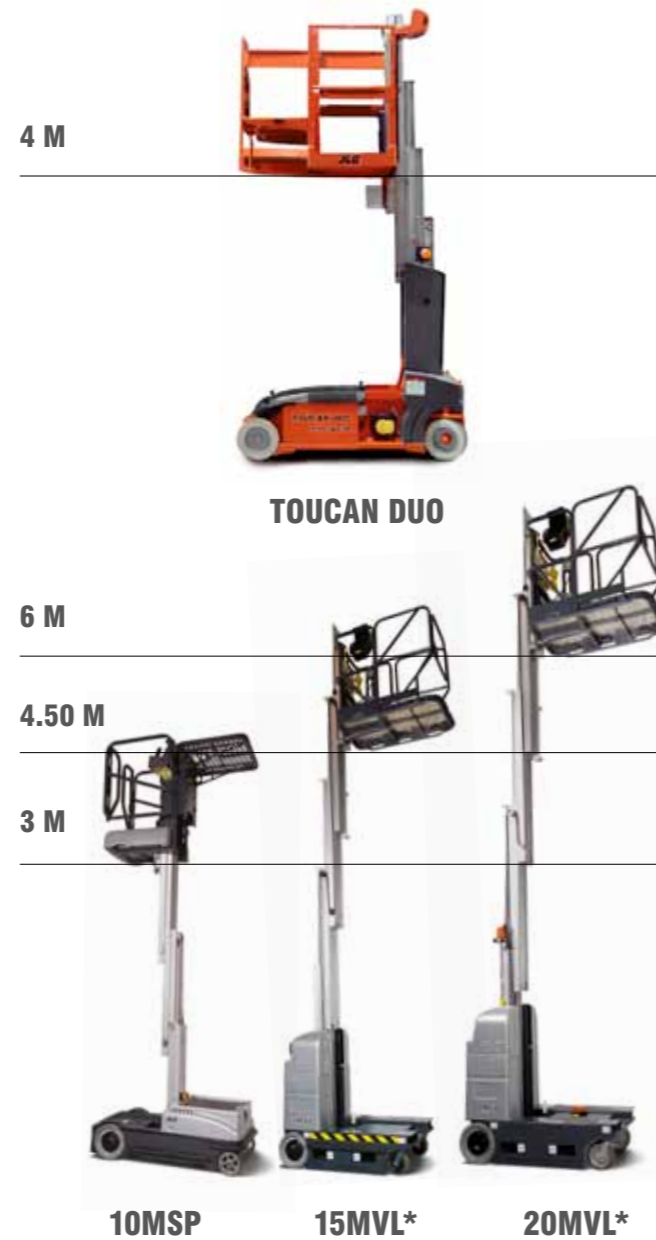

Get your work done more efficiently with the power of JLG.

Discover the family of JLG® Stock Picking solutions.

JLG offers a complete line of stock pickers that are designed to improve the efficiency, reach and safety of your workers.

*With Stock Picking platform

MOBILE STOCK PICKERS

More powerful, more reliable and more versatile, the drivable stock pickers will help you meet more of your access challenges.

A big step up in employee productivity.

With the MSP Series, your workforce can reach higher, carry more weight and work more efficiently. A single worker with an MSP stock picker can lift and carry up to 230 kg (people and materials) at working heights up to 8 m, and do work that would typically require two people with a ladder.

What's more, with heavy-duty aluminum mast sections, maintenance-free components, innovative controls and automatic battery charging, MSP lifts provide the reliability and long-lasting performance you need.

MSP SERIES ADVANTAGES

- Rugged planetary gear motors with 5 times the brush life of other models.
- Easier access to confined work areas.
- Reduced labor costs – pick stock with a single operator.
- Improved safety over scaffolding and ladders.
- Less setup time and faster job completion.

With the ability to reach higher and carry more weight, workers can manage inventory with greater speed and efficiency.

With a clean design and non-marking tyres, the MSP Series is ideal for stores, office areas, schools, hospitals and other indoor environments.

A versatile performer.

With their compact size, joystick controls and a zero turning radius, the versatile MSP stock pickers provide the manoeuvrability and positioning needed for confined spaces.

Through doorways, down narrow aisles and all around busy work environments, they'll go places even a ladder can't reach. Plus, with a family of platforms, MSP stock pickers can be configured to your specific stock picking requirements and other maintenance needs.

JOYSTICK CONTROL

The advanced Point & Go® drive and steer joystick controller provides one-handed control while leaving one hand free for increased operator comfort and efficiency.

MSP SERIES APPLICATIONS

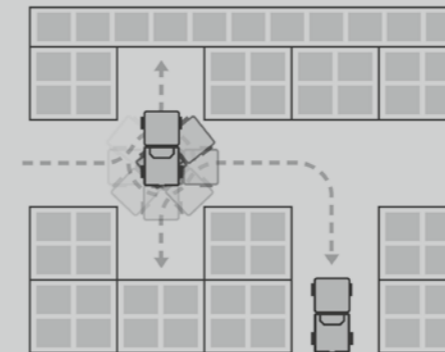

- Stock Picking and Restocking Shelves
- Transporting Supplies
- Managing Inventory
- Setting Up Displays
- Hanging Decorations
- Lighting
- Routine Maintenance
- General Repair Work
- Hundreds of Everyday Tasks

Major mobility.

Whether you're performing routine maintenance or managing inventory, you can take the MSP Series virtually anywhere, from factories, distribution and retail centers to theaters, airports, places of worship, entertainment facilities and more.

With the lightest weight in the industry, a narrow design and zero turning radius, challenging spaces are no longer an issue. The MSP Series lets you get your work done quickly and efficiently so you're ready for the next task.

MSP SERIES STOCK PICKERS ADVANTAGES

WORKING IN TIGHT SPACES

MSP Series lifts are ideal for stores, warehouses and storage areas where space is limited.

ZERO TURNING RADIUS

Compact design allows the MSP Series to turn on its own axis.

Reduce manual handling even further.

The Toucan™ Duo features a powered material tray which can reduce the manual handling element of stock picking even further. Ideal for stock picking and inventory control duties, the Duo features double-side entry gates and a spring-retracting belt guard on the tray to secure stock items and help prevent them from falling. The machine's compact design and low stowed height also make the Duo well suited for use in busy retail stores, offices, or any area where space is limited.

The aluminum mast provides rigidity and ease of maintenance, whilst the direct electric drive system with brushless AC motor allows for extended duty cycles. Proportional drive controls and a zero turning radius provide a smoother ride and greater manoeuvrability.

1. POWERED MATERIAL TRAY

With lift/lower control for greater efficiency.

2. AC CORD RETRACTOR

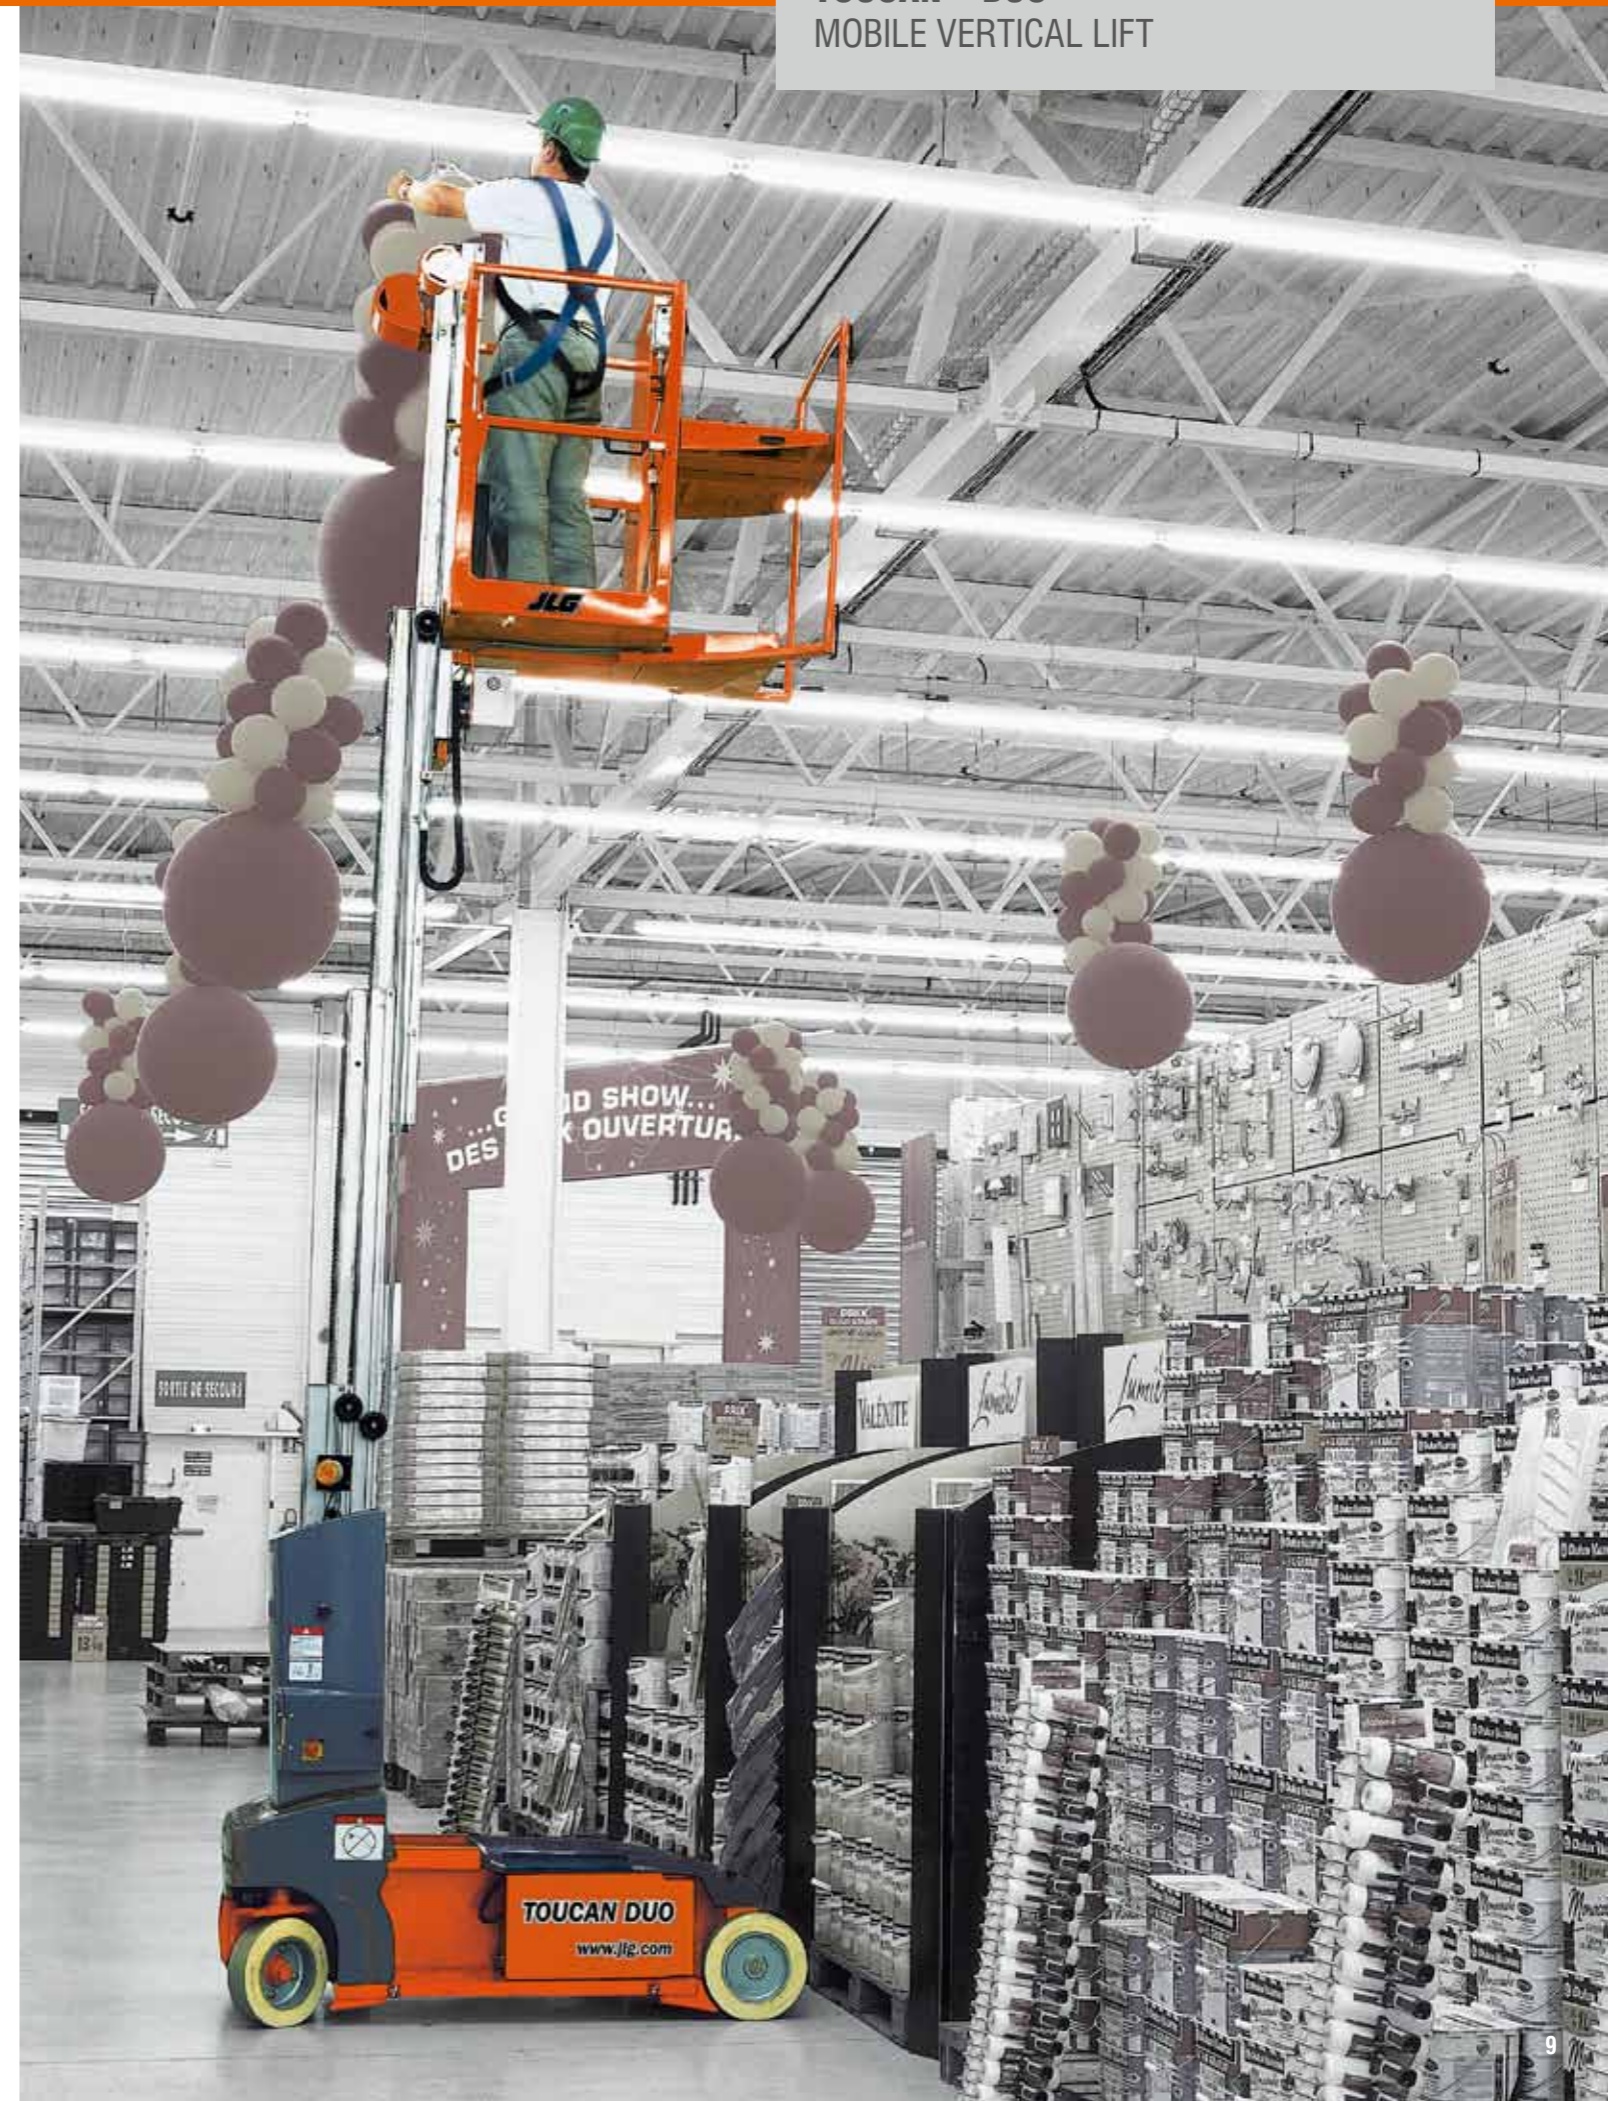

Easier access to the charge cord.

3. THE PLATFORM CONTROLS

Comfortable and easier to use.

TOUCAN DUO™ ADVANTAGES

- Working height of 6 m and 200 kg capacity – 130 kg on platform + 70 kg on material tray.
- 20% gradeability for greater mobility.
- Compact dimensions and low stowed height allow easier access through doorways.
- Aluminum mast provides rigidity and ease of maintenance.
- Powered material tray with lift/lower control.

STOCK PICKER PLATFORMS

TOUCAN™ DUO

- 0.75 x 0.65 m operator platform with double side entry gates
- 0.75 x 0.50 m powered material tray
- 130 kg capacity
- 70 kg material tray capacity

15MVL/20MVL

- 0.71 x 1.22 m stock picking/personnel platform*
- Front entry with flexible or fixed rail set-up
- 230 kg total capacity

*Stock is placed at foot level on this platform option.

STOCK PICKER PLATFORMS

10MSP

- 0.69 x 0.50 m personnel platform
- Adjustable 0.66 x 0.66 m material tray
- Saloon-style rear-entry gate
- 160 kg operator's platform capacity
- 115 kg material tray capacity
- 115 kg carry deck capacity

20MVL PLATFORM WITH MATERIAL TRAY

- 0.69 x 0.58 m personnel platform
- Fold-down 0.69 x 0.58 m material tray
- Saloon-style side-entry gate
- 45 kg material tray capacity
- 115 kg platform capacity

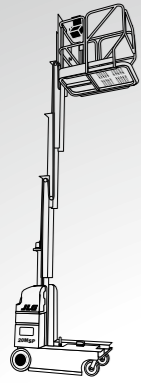

VERTICAL MAST LIFT PLATFORMS

15MVL AND 20MVL WITH EXTENSION PLATFORMS

- Extension platform retracted – 0.66 x 0.66 m
- Extension platform extended – 0.66 x 1.25 m
- Slide bar – rear entry
- 160 kg platform capacity (20 MVL)
- 230 kg platform capacity (15MVL)

AERIAL WORK PLATFORMS SPECIFICATIONS

Main features:

- JLG Point & Go® fully proportional drive/steer single joystick control
- Direct electric two wheel drive
- On-board diagnostics
- Sealed maintenance-free batteries
- Low maintenance anodised aluminum mast
- Pothole protection system
- Non-marking tyres

MSP Series Mobile Stock Pickers

Platform Height	3.05 m
Working Height	5.05 m
Operator Platform Capacity	160 kg
Material Tray Capacity	115 kg
Overall Height Stowed	145 cm
Maximum Drive Height	Full Height
Turning Radius	Zero
Weight	500 kg

Available options

Programmable 4-Digit Security Lock	•
Motion Alarm	•
Guide Roller System	•

AERIAL WORK PLATFORMS SPECIFICATIONS

Main features:

- Fully proportional drive joystick control with integral thumb steer switch
- Dedicated material tray controls
- Battery condition indicator on platform
- Brushless AC motors
- Low maintenance non-rotating extruded aluminum mast
- Food compatible lubrication and hydraulic oil
- 2 degree tilt indicator and alarm

Toucan™ Duo

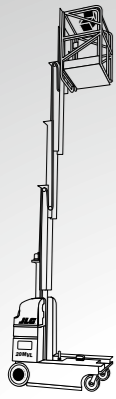

Platform Height	4.00 m
Working Height	6.00 m
Platform Capacity	130 kg
Tray Capacity	70 kg
Overall Height Stowed	1.79 m
Weight	1.000 kg
Overall Length Stowed	1.65 m

Available options

4 x 6 Volt, 180 A/Hr Gel Batteries	•
Battery Discharge Indicator with Low Charge Function Cut-out	•
Low Temperature Lubrication	•

• Available - Not available

AERIAL WORK PLATFORMS SPECIFICATIONS

Main features

- Quick change platform mounts
- Point & Go® fully proportional drive/steer single joystick control
- Direct electric two wheel drive
- Sealed maintenance-free batteries
- On-board diagnostics
- AC Power cable to platform
- Low maintenance anodised aluminum mast
- Non-marking tyres
